

## INSPECTION

### 1. INSPECT GARAGE DOOR OPENER

- (a) Press the switch and check that each LED (red) lights up. Even if only one switch is found not to light up, replace the garage door opener.

### 2. INSPECT GARAGE DOOR OPENER REGISTRATION AND TRANSMITTING

#### HINT:

Use the home link tester made by KENT MORE for this test. Because it is necessary to register the code of the hand-held transmitter, the customer's code should be erased. When the inspection is complete, register the customer's code again.

- (a) Check that the code of hand-held transmitter for inspection can be registered.

#### HINT:

If the code can not be registered, replace the garage door opener.

- (b) Press the switch which inspection code has been registered for and check that LED (green) of the home link tester lights up.

#### HINT:

If the LED (green) does not light up, replace the garage door opener.
