## INSPECTION PROCEDURE

### 1 INSPECT DISC PLAYER ASSY

- (a) Remove the Disk player assy with connectors with still connected.
- (b) Check voltage.
  - (1) Measure voltage between terminals +B, ACC and GND of radio receiver assy at each conditions, as shown in the chart.

**Standard:**

Terminal	Condition	Voltage (v)
+B ↔ GND	Constant	10 - 14 V
ACC ↔ GND	Turn ignition switch ACC	10 - 14 V

- (c) Check continuity.
  - (1) Check that the continuity exists between terminal GND of Disk player assy and body ground.

**Standard: Continuity exists.**

OK

REPLACE DISC PLAYER ASSY
